

To our First National Wealth Management Clients:

We hope this email finds you well. As we all hunker down and practice social distancing to hopefully lessen the impact of this medical crisis, we at First National Wealth Management want you to know that we are here for you, even as many of our staff work remotely from their homes. Although our offices and bank branches are closed to foot traffic to keep our employees, customers and communities safe, we can always be reached by phone or email to process requests or answer any questions you may have.

It goes without saying that the first quarter of 2020 was the worst period for equities since the great recession of 2008. Sharp market declines—in 1Q the S&P 500 reached bear market territory in the fastest time on record—can leave some investors tempted to sell to avoid further losses. But policymakers have shown a willingness to act, and the virus has now been contained in China and shown some signs of slowing in Italy. This news has lifted markets, and further upside cannot be ruled out, but neither can the downside. Downside risks can be better managed through diversification across assets and regions. First National Wealth Management mutual fund models were created for just this purpose, and our investment committee will monitor developments in the fight against the virus to determine when to rebalance the models and increase our equity allocations.

Over the longer term, it is important to remember that bear markets are painful, but also rare and relatively short-lived. Since WWII, during S&P 500 bear markets the maximum drawdown has been 34.5% on average, erasing 65 months of prior gains and taking 39 months to reach a new all-time high. To help overcome the behavioral bias to sell out at the wrong time, it's important to build a robust financial plan and to be comfortable with your portfolio allocation in both up and down markets to avoid market timing. The chart below illustrates this point:

Our team wishes all of you peace and good health during this unprecedented time in our history. As always, please contact us if you would like to discuss your account or have general questions or concerns. Thanks again for your business and confidence!

Sincerely,

**Matthew Weaver, CTFA** | Vice President & Chief Investment Officer

# Quarterly Market Review: January-March 2020

## The Markets (first quarter through March 31, 2020)

The world's economies and stock markets have been rocked by the spread of COVID-19. Investors' fears prompted a major sell-off in February and March, plunging stocks well below their 2019 closing marks. Nevertheless, 2020 started off in a positive way. Following a strong 2019, stocks were slow to move forward as investors cashed in some of their 2019 gains. But by mid-January, each of the benchmark indexes were safely ahead of their 2019 closing marks. However, concerns over the COVID-19 outbreak in China quelled investor optimism. By the end of January, only the small caps of the Nasdaq remained ahead of their prior year's pace, as each of the remaining indexes listed here fell into the red.

February started off as January ended, with investors more inclined to sell rather than buy equities. However, word of China's plans to cut tariffs on some U.S. imports sent stocks higher during the second week of the month. The Nasdaq was more than 6% over its 2019 year-end value while both the S&P 500 and the Dow also pushed ahead. But by the third week of February, the impact of the virus was becoming evident with news of a widespread outbreak in South Korea. Selling accelerated the following week as outbreaks were reported in Iran and Italy. As more cases were reported in the United States, investors feared that containment of the virus was not likely and rushed to cash in stocks. By the end of February, each of the indexes lost significant value led by the Dow, which fell more than 10% for the month.

March 2020 will surely go down as one of the most turbulent months. COVID-19 continued to spread worldwide. In the United States, confirmed cases and, unfortunately, deaths spiraled. Fear became the motivating factor in our daily lives — fear of catching the virus, fear of the illness affecting our loved ones, fear of losing our jobs, fear of economic failure, and fear of losing our money. With respect to the stock market, this fear manifested itself in a major sell-off for most of the month. After falling sharply during the last week of February, stocks rebounded marginally to open the month. But that push was short-lived as stocks plummeted dramatically mid-March, despite the announcement of new actions and legislation by the Federal Reserve, Congress, and the President. On March 20, each of the benchmark indexes listed here posted double-digit losses. Year to date, the major indexes were more than 20% behind their 2019 closing values. The passage of the CARES Act at the end of the month helped ease investors' concerns enough to move back to stocks. The end of the month saw each of the benchmark indexes post major gains, with the Dow marking its best single day since 1938. However, the spike in index values was not nearly enough to offset the major losses sustained throughout the month. March saw the Dow fall almost 14%, the S&P 500 drop over 12%, the Nasdaq lose 10%, the Global Dow give back close to 15%, and the small caps of the Russell 2000 plunge nearly 22%.

The first quarter of 2020 closed with each of the benchmark indexes securely in the red compared to their 2019 year-end values. The Russell 2000 again suffered the largest three-month fall, closing the quarter down nearly 31%. The Dow suffered its worst quarter since 1987, while the broader-based S&P 500 hasn't seen a quarterly decline this bad since 2008. The Nasdaq fell more than 14%, marking its worst quarter since 2018. The Global Dow fell over 24% for the quarter.

By the close of trading on March 31, the price of crude oil (WTI) had sunk to \$20.35 per barrel, well below the February 28 price of \$45.19 per barrel. The national average retail regular gasoline price was \$2.120 per gallon on March 23, down from the February 24 selling price of \$2.466 and \$0.503 less than a year ago. The price of gold finished March at \$1,591.20, slightly higher than its February closing value of \$1,585.80.

#### Key Dates/Data Releases

4/1: PMI Manufacturing Index, ISM Manufacturing Index

4/2: International trade in goods and services

4/3: Employment situation, ISM Non-Manufacturing Index

4/7: JOLTS

4/9: Producer Price Index

4/10: Consumer Price Index, Treasury budget

4/14: Import and export prices

4/15: Retail sales, industrial production

4/16: Housing starts

4/21: Existing home sales

4/23: New home sales

4/24: Durable goods orders

4/28: International trade in goods

4/29: GDP, FOMC statement

4/30: Personal income and outlays

Market/Index	2019 Close	As of March 31	Monthly Change	Quarterly Change	YTD Change
DJIA	28,538.44	21,917.16	-13.74%	-23.20%	-23.20%
Nasdaq	8,972.60	7,700.10	-10.12%	-14.18%	-14.18%
S&P 500	3,230.78	2,584.59	-12.51%	-20.00%	-20.00%
Russell 2000	1,668.47	1,153.10	-21.90%	-30.89%	-30.89%
Global Dow	3,251.24	2,469.53	-14.84%	-24.04%	-24.04%
Fed. Funds	1.50%-1.75%	0.00%-0.25%	-150 bps	-150 bps	-150 bps
10-year Treasuries	1.91%	0.69%	-43 bps	-122 bps	-122 bps

## Latest Economic Reports

- **Employment:** Employment rose by 273,000 in February after adding 225,000 new jobs in January. In 2019, job growth averaged 178,000 per month. Notable job gains occurred in health care and social assistance, food services and drinking places, government, construction, professional and technical services, and financial activities. The unemployment rate dropped 0.01 percentage point to 3.5% for the month as the number of unemployed persons dropped by close to 100,000 to 5.8 million. In February, average hourly earnings for all employees rose by \$0.09 to \$28.52. Average hourly earnings increased by 3.0% over the last 12 months ended in February. The average workweek rose by 0.1 hour to 34.4 hours in February. The labor participation rate for February was 63.4%, the same as in the previous month. The employment-population ratio was 61.1% last month (61.2% in January).
- **FOMC/interest rates:** The Federal Open Market Committee held several emergency meetings in March, dropping the target range for the federal funds rate 150 basis points to 0.00%-0.25%. To further combat the economic impact of COVID-19, the Committee proffered a number of new and drastic measures. Among the actions taken by the Fed are unlimited bond buying including the purchase of corporate bonds; \$300 billion in new financing; and the establishment of two new facilities, the Term Asset-Backed Securities Loan Facility to enable the issuance of asset-backed securities, and a Main Street Business Lending Program to support lending to eligible small and medium-sized businesses.
- **GDP/budget:** According to the third and final estimate for the fourth-quarter gross domestic product, the economy accelerated at an annualized rate of 2.1%, the same rate as in the third quarter. Consumer spending grew at a rate of 1.8% (3.2% in the third quarter), fixed investment fell 0.6% in the fourth quarter (-0.8% in the third quarter), and nonresidential fixed investment dropped 2.4% in the fourth quarter, compared to a 2.3% decline in the prior quarter. Consumer prices advanced at a rate of 1.4% in the fourth quarter, comparable to the third quarter (1.3%).
- Last February saw a budget deficit of \$235 billion. Through the first five months of the 2020 fiscal year, the deficit sits at \$624.5 billion, 14.8% greater than the deficit over the same period last fiscal year. Compared to the same period last year, government spending climbed 9.2%, far exceeding receipts, which rose 7.0%. In February, the largest expenditures were for Social Security (\$91 billion), income security (\$91 billion), national defense (\$55 billion), and Medicare (\$52 billion). On the income side of the ledger, social insurance and retirement accounted for \$100 billion and individual income taxes totaled \$70 billion.
- **Inflation/consumer spending:** According to the Personal Income and Outlays report for February, personal income rose 0.6% for the month, the same advance as in the previous month. Disposable, or after-tax, income increased 0.5% after increasing 0.6% in January. Consumer spending rose 0.2% in February for the second consecutive month. Price inflation remained low, however, as consumer prices inched ahead 0.1% for the third month in a row. Over the last 12 months, consumer prices are up 1.8%.
- The Consumer Price Index inched ahead 0.1% in February, the same increase as in January. Year to date, consumer prices are up 2.3%. Increases in prices for shelter (which makes up the largest portion of overall consumer costs) climbed 0.3% in February following the same 0.3% increase in January. Energy prices dropped 2.0% in February after falling 0.7% in January. Gas prices plummeted 3.4% while fuel oil prices decreased 8.5%.
- Prices producers receive for goods and services fell 0.6% after advancing 0.5% in January. The index has increased 1.3% since last February. Producer prices less foods, energy, and trade services inched down 0.1% in February following a 0.5% increase in January. Since February 2019, prices less foods, energy, and trade services moved up 1.4%. In February, producer prices for goods fell 0.9%, the largest

decline since moving down 1.1% in September 2015. Over 60% of the February decrease in goods prices is tied to a 3.6% drop in energy prices.

- **Housing:** After falling 1.3% in January, existing home sales jumped 6.5% in February. Year over year, existing home sales are up 7.2% (9.6% for the 12 months ended in January). The median sales price for existing homes was \$270,100 in February, compared to \$266,300 in January. Existing home prices were up 8.0% from February 2019. Total housing inventory at the end of February was 1.47 million, an increase from the January rate of 1.42 million units for sale. Following a strong January, sales of new single-family homes decreased in February, falling 4.4% below January's totals. Sales are 14.3% above the February 2019 estimate. The median sales price of new houses sold in February was \$345,900 (\$348,200 in January). The average sales price was \$403,800 in February (\$402,300 in January). Available inventory, at a 5.0-month supply, was slightly lower than January's 5.1-month supply.
- **Manufacturing:** For the first time in three months, industrial production increased, climbing 0.6% in February after falling 0.5% the previous month. Manufacturing output edged up 0.1% last month but is still 0.4% below its level of a year earlier. Total industrial production was unchanged from a year earlier. New orders for durable goods climbed 1.2% in February following a 0.1% increase in January. New orders have advanced four out of the last five months. For the year, new orders for durable goods are up 0.4%. New orders for transportation equipment drove the increase, vaulting 4.6% in February. However, excluding transportation, new orders fell 0.6%. New orders for capital goods (manufactured assets used by businesses to produce consumer goods) jumped ahead 4.1% in February, driven primarily by a jump in new orders for defense capital goods, which soared 25.7%. Orders for nondefense capital goods inched up 0.5%.
- **Imports and exports:** Import prices fell 0.5% in February after inching up 0.1% in January. February's drop in import prices was the largest decrease since a similar decrease last August. Since February 2019, import prices have fallen 1.2%. Fuel imports plunged 7.7% in February, the largest monthly decline since prices receded 7.8% in June 2019. Excluding fuel, import prices actually increased 0.3% in February. Prices for exports dropped 1.1% last month after advancing 0.6% in January. This is the largest monthly decrease in export prices since December 2015. Prices for exports decreased 1.3% on a 12-month basis from February 2019.
- The international trade in goods deficit was \$59.9 billion in February, down from \$65.5 billion in January. Exports of goods for February increased 0.5% to \$136.5 billion. Imports of goods dropped 2.6% to \$196.4 billion.
- The latest information on international trade in goods and services, out March 6, is for January and shows that the goods and services trade deficit shrank to \$45.3 billion, \$3.3 billion less than the December trade gap. January exports were \$208.6 billion, \$0.9 billion less than December exports. January imports were \$253.9 billion, \$4.2 billion lower than December imports.
- **International markets:** The spread of COVID-19 sent world markets and economies tumbling. With over 110 countries and territories reporting cases of the virus, major institutions and banks have cut their forecasts for the global economy. Several nations, led by China, have ordered certain areas locked down, restricting movements of millions of people and suspending business operations. China's gross domestic product is expected to plunge to 4.9% this year, slower than earlier forecasts of 5.7% annual growth. Year to date, the STOXX Europe 600 Index fell almost 23%, Germany's DAX slipped over 24%, France's CAC 40 lost 24%, Italy's FTSE MIB Index dropped 26%, the UK's FSTE 100 Index has given back close to 23%, and Japan's NIKKEI 225 is down 21%.
- **Consumer confidence:** Not surprisingly, the Conference Board Consumer Confidence Index® declined sharply in March. The index fell to 120.0 from February's 132.6. The Present Situation Index — based on consumers' assessment of current business and labor market conditions — decreased from 169.3 to 167.7. However, the Expectations Index, which is based on consumers' short-term outlook for income, business, and labor market conditions, fell from 108.1 to 88.2.

## Eye on the Month Ahead

Individuals' health is of primary importance as the world continues to battle the effects of COVID-19. Of secondary, but great importance, is the impact of this pandemic on the world's economies and markets. April will, hopefully, begin to point toward recovery of both personal and economic health. The impact of the CARES Act should begin to be felt by individuals and businesses next month.
